

Muhammad Hassan Iqbal

Full Stack Software Engineer

Lahore, Pakistan | +92 3222765632 | mhassaniqbal18@gmail.com
linkedin.com/in/muhammad-hassan-iqbal | github.com/hassaniqbalo3

PROFESSIONAL SUMMARY

Detail-oriented Full Stack Developer with hands-on experience building scalable, secure web applications using Node.js, React.js, and Laravel. Adept at designing RESTful APIs, implementing robust authentication systems, and developing responsive user interfaces. Proven ability to deliver end-to-end solutions, optimize backend services, and write clean, maintainable code. Passionate about problem-solving and contributing to agile software development teams as an early-career engineer.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, PHP, SQL, HTML5, CSS3
Frontend:	React.js, Next.js, Redux Toolkit, Tailwind CSS
Backend:	Node.js, Express.js, Laravel, RESTful APIs
Databases:	MySQL
Tools & Cloud:	Git, GitHub, AWS Lambda, GraphQL
Concepts:	Full Stack Development, API Integration, Authentication (JWT), CRUD, Responsive Web Design, Object-Oriented Programming (OOP)

PROFESSIONAL EXPERIENCE

FrontEnd Developer | 7KingsCode

04/2026 – Present

Lahore, Pakistan

- Developed scalable and reusable user interface components utilizing **React.js**, significantly improving development efficiency and application maintainability.
- Integrated **REST APIs** and effectively managed asynchronous data flow and state management across the application.
- Enhanced overall user experience (UX) by implementing responsive design principles and optimizing component rendering for faster load times.
- Applied software engineering best practices for clean code, structured component architecture, and long-term maintainability.
- Built interactive client-side features with comprehensive form validation, error handling, and real-time user feedback mechanisms.

Backend Development Intern | Icommunix

12/2024 – 06/2025

Lahore, Pakistan

- Built and maintained **RESTful APIs** utilizing **Node.js** and **MySQL** to support cross-functional web application requirements.

- Managed robust backend logic for secure user authentication, session management, and authorization workflows.
- Contributed to the development and optimization of highly secure and scalable backend modules.
- Configured and deployed backend serverless functions utilizing **AWS Lambda** for scalable execution.

PROJECTS

Frontend Developer – CWS Project (Headless Sitecore CMS)

Tech Stack: React.js, TypeScript, Next.js, GraphQL, Tailwind CSS

- Contributed to a scalable, headless CMS-based web application leveraging **Next.js** and Sitecore.
- Engineered reusable **React.js** components adhering to modern frontend development practices and strictly typed with **TypeScript**.
- Improved application responsiveness and visual interface aesthetics utilizing **Tailwind CSS**.
- Collaborated within a team environment utilizing **Git** version control and continuous deployment workflows.

Secure Login System with CRUD Operations

Tech Stack: Node.js, Express.js, MySQL, Joi, Crypto.js

- Developed a secure backend application featuring comprehensive **CRUD functionality** for robust user management.
- Implemented strict input validation methodologies using Joi to ensure data integrity and prevent malformed requests.
- Encrypted user credentials securely leveraging Crypto.js to enforce high-level authentication standards.
- Designed and optimized **SQL** queries to facilitate highly efficient database interactions and data retrieval.
- Exposed **REST APIs** to manage authentication protocols and administrative user operations effectively.

EDUCATION

BS (Information Technology)

09/2020 – 07/2024

University of Education | Lahore, Pakistan

Relevant Coursework: Software Engineering, Object-Oriented Programming (OOP), Databases, Networking, Cloud Computing, Data Mining, Advanced Programming.
